Dear Dr. Kavitha Reja,

We The Training Unit, The Leprosy Mission Hospital Naini express our appreciation to JSS College of Physiotherapy, Mysore, for motivating students to attend the 'Certificate Course in Physiotherapy in Leprosy'. We have conducted 2 weeks training for 32 Post graduate students between Dec 2015 and March 2019.

Students feedback regarding this program:

- *Whatever we have learnt in theory, we also seen practically*
- *Adequate interaction between facilitators & students to clarify doubts*
- *This training has successfully removed the little stigma that was present in me*
- *I have learnt many new things that I would never thought even exist*
- *Not just theory and video, but it was a holistic approach to understand with explanation, video feedback plus practical implications*
- *The regular use of splints/modifications helps not only for leprosy patients but other conditions as well*

We thoroughly enjoy training PGs from JSS college of Physiotherapy because:

- *Their basic physiotherapy skills are commendable*
- *Quick and eager to learn*
- *Professionalism with our faculty*
- *Caring attitude towards patients and their families*

We appreciate the ongoing bond with JSS College which helps us in our efforts towards a Leprosy Free World. We request you to keep encouraging students to attend this training.

Thanking you.

Dr. Loretta Das, M.D.,
Training in-charge

"People affected by leprosy living with dignity in transformed communities that have overcome leprosy."
